

Atlas of Japanese Scarabaeoidea

This is a comprehensive color photographic catalogue of Japanese Scarabaeoidea. The series are expected to be in three volumes, and the first volume, coprophagous group, has just published in Aug. 2005. It contains all known 152 species and 9 subspecies of dung beetles in Japan. One species is shown on one full page with more than 10 detail cut. The photos are one of the highest quality taken by most advanced Japanese digital camera. Text is in Japanese but most information like distribution, adult season or altitude has shown by chart, so easy to understand for everyone. Because of so beautiful plates, not only Coleopterists but also all insect lovers can enjoy.
