

# TOMBO, LX, 2018

## 目次 (CONTENTS)

### 総 説 (Review)

- 二橋亮・奥出紘太・杉村光俊・鶴飼貞行：日本国内から記録されたトンボの種間雑種 ······ 1 ~ 49  
(Futahashi, R., G. Okude, M. Sugimura & S. Ugai: Interspecific hybrids in Japanese Odonata)

### 原著論文 (Articles)

- Karube, H. & O. E. Kosterin : *Mattigomphus* gen. nov., a new gomphid genus from Indochina region, separated from *Anisogomphus* (Odonata: Gomphidae) ······ 61 ~ 65  
Phan, Q. T., H. Karube & A. Sasamoto: *Drepanosticta draco* sp. nov., a new damselfly from northern Sumatra, Indonesia (Odonata: Platystictidae) ······ 66 ~ 70  
Karube, H. & T. Kompiere : Two new species of the genus *Periaeschna* from northern Vietnam, with additional notes on the genus (Odonata: Aeshnidae) ······ 71 ~ 78  
Sasamoto, A., I. Kawashima, T. Kompiere, R. Futahashi: Consideration of the taxonomical relationship of *Sympetrum speciosum* and its subspecies *haematoneura* based on adult and larval morphology and genetic analyses, with a first record of *speciosum* from Vietnam and larval description of *haematoneura* (Anisoptera: Libellulidae) ······ 79 ~ 89  
奥山永・川中美沙・原彩音・竹内暎依・鈴木峻・佐々木瀬奈・渡部慶一郎・大崎健志郎・平野謙二・清拓哉・高橋純一：絶滅危惧種ハツチヨウトンボ *Nannophya pygmaea* (トンボ目: トンボ科) の遺伝的多様性－島根県浜田市金城町における報告－··· 90 ~ 95  
(Okuyama, H., M. Kawanaka, A. Hara, A. Takeuchi, R. Suzuki, S. Sasaki, K. Watanabe, K. Osaki, K. Hirano, T. Kiyoshi, J. Takahashi : The genetic diversity of a threatened skimmer species, *Nannophya pygmaea* (Odonata: Libellulidae): a report on the population in Kanagicho, Hamada City, Shimane Prefecture, Japan)
- 短 報 (Short Communications)
- 奥出紘太・二橋亮・鶴殿清文：1962年に採集されたマユタテアカネとミヤマアカネの種間雑種のDNA解析 ······ 50 ~ 52  
(Okude, G., R. Futahashi & K. Udono : DNA analysis of a hybrid between *Sympetrum eroticum* and *Sympetrum pedemontanum* collected in 1962)  
清水典之・二橋亮：愛知県でナツアカネとマダラナニワトンボの種間雑種を確認 ······ 52  
(Shimizu, N. & R. Futahashi : A record of a supposed hybrid between *Sympetrum darwinianum* and *Sympetrum maculatum* from Aichi Prefecture)  
杉村光俊・奥出紘太・二橋亮：過去に外部形態から推定された種間雑種3例のDNA解析 ······ 53 ~ 56  
(Sugimura, M., G. Okude & R. Futahashi : DNA analyses of three dragonfly hybrids previously suspected by external morphology)  
鶴飼貞行・二橋亮：ギンヤンマ属およびハネビロトンボ属の種間雑種の解析 ······ 57 ~ 60  
(Ugai, S. & R. Futahashi : DNA analysis of the two hybrid specimens belonging to the genera *Anax* and *Tramea*)  
川島逸郎・笛本彰彦・鍵本文吾：オナガサナエ♂の第4腹節に生じたホメオシスと推定される2次生殖器類似構造 ······ 96 ~ 97  
(Itsuro, K., A. Sasamoto & B. Kagimoto : The supposed homeosis of the structure like secondary male genitalia appearing from anterior part of the 4th abdominal sternite in *Melligomphus viridicostus* (Oguma, 1926))  
須田真一・二橋亮：ギンヤンマのホメオシス ······ 98 ~ 99  
(Suda, S. & R. Futahashi : A record of the homeosis in *Anax parthenope*)  
黒田剛広・二橋亮：ヒメハネビロトンボの翅斑変異個体 ······ 99 ~ 101  
(Kuroda, T. & R. Futahashi : A record of a unique wing marking pattern for *Tramea transmarina* Brauer, 1867 in Japan)
- 59巻正誤表 (Corrigenda for Vol. 59, 2017) ······ 130  
2017年度日本トンボ学会大会 ······ 130  
編集後記 (Letter from Editor) ······ 130
